Subject: New T10 Project for SDI

Debbie,

At their November 2004 meeting, T10 has voted to create a new project for Serial Attached SCSI Driver Interface (SDI). From the draft T10 minutes:

"10.3 Project proposal for Serial Attached SCSI Driver Interface (SDI) (04-345) [Fairchild and Elliott]

Rob Elliott presented the SDI project proposal, 04-345r1. Emily Hill stated that Microsoft was opposed to the proposal because it specifies an interface that is not the appropriate purview of T10. Mark Overby stated that there are numerous problems with defining IOCTL interfaces. Rob Elliott stated that the proposal allows management and diagnostic tools to gain access to the SMP and STP services that the main driver path is never going to expose.

Rob Elliott moved that 04-345r1 be approved as a new project proposal for Serial Attached SCSI Driver Interface (SDI). Kevin Marks seconded the motion.

The motion passed on a two-thirds vote of 19:6:12:3=40.

Bob Snively stated that his abstention was based on a belief that the resulting standard will gain insufficient acceptance to make the work worthwhile.

John Lohmeyer took an action item to forward 04-345r1 to INCITS for further processing as a new project proposal for SDI."

Please forward this project to INCITS for approval.

Thanks!  
John

The pertinent documents are:

Approved project proposal:

T10/04-345r1 <http://www.t10.org/ftp/t10/document.04/04-345r1.pdf>

Draft Agenda containing this item (10.3):

T10/04-322r2 <http://www.t10.org/ftp/t10/document.04/04-322r2.pdf>
