

CS1/06-0203 Zygma Partnership Contribution to Delegate Instructions for WG1

Colleagues,

Although I don't expect to be going to ZA I did follow the link Dan provided (<http://www.internetsite.co.za/sc27>) and followed through to the meeting schedule.

There I noted that 27006 gets (if I summed it correctly) 21hrs of air-time (OK, so it needs to get published asap, but 21hrs???) but 27003 gets only 3hrs. Is this good (we might be in no hurry to see it published as presently set out) or is this bad (insufficient time to press the case and establish it on an improved path)?

Should we request additional time to 27003 in order to try to make some progress? 3hrs seems insufficient to deal with the issue of a mid-course correction and/or a large number of detail comments on the present text, plus a substantial contribution, the US' if no others.

Any ideas?

Best,

Richard.
