

CS1/07-02xx ISSAA Liaison report from Eva Kuiper for September 2007 CS1 Meeting #11

ISSAA activities since August 2007 CS1 meeting

An announcement was made to the mailing list that voting is taking place on the joint IEEE-ISO document 15026 Systems and software engineering – Systems and software assurance = IEEE P15026. It's a CD right now.

A new process flow diagram was circulated on the mailing list. This one is a big improvement on the previous diagram. When looking over the current draft, it is of concern that this is beginning to look like a model for the NIST 800 series. It is suggested that others in CS1 take a look at the documents posted at <http://issaa.org>.
