Title : US Position for WG1/TF2 meeting 2004-06

Author/Submitter : US National Body

Requested action : for discussion at WG1/TF2 meeting 2004-06

Document type: WG1 Committee Document

Document subtype: N/A

Document stage: N/A

Document language: E

To: Steve Brunt
From: Julie Hermanson, B10.3 Chair
Subject: US Position for WG1/TF2 June 2004 Meeting (Okinawa)

US Position

The US agrees that the New Work Proposal on Card Service Life (1N1302) should be submitted to SC17. The working document from AFNOR/DIN and the working document from the US (to be submitted after the US meeting in August 2004) should be submitted along with the work proposal. We feel that quantifiable field data (such as that from the Xavier University card use study conducted by the US) should be the basis for developing test methods and criteria for Card Service Life Document.

The US will present a final report on the Xavier University data at the October 2004 WG1/TF2 meeting. The US National Body requests that other National Bodies present field studies data before the New Work Proposal (1N1302) is submitted to SC17.
