

ISO/IEC JTC1/SC17 N 3195

DOCUMENT TYPE: Information from SC Secretariat

TITLE: Withdrawal of ISO/IEC FDIS 7811-8 – Identification cards – Recording technique – Part 8: Magnetic stripes – Coercivity of 51,7 kA/m (650 Oe) from ballot.

BACKWARD POINTER: N 3131

SOURCE: SECRETARIAT ISO/IEC JTC1/SC17

STATUS: The FDIS ballot for ISO/IEC 7811-8 is being withdrawn due to sustained resistance from the provider of the reference material (PTB). PTB is unwilling to provide the material 7811-8 refers to, as a reference material for this standard. PTB considers the foreseen reference material as unfit to serve as a reference material for 7811-8.

WG1 feels the need to revisit the issue of reference material before the standard can be published. This is likely to include the establishment of a new reference material. WG1 will address this issue during its March Meeting
