

Reference number of document: ISO/IEC JTC1/SC17/WG1 N **1694**

Date of registration: 2007-07-13

Committee identification: ISO/IEC JTC1/SC17/WG1

Secretariat: Steve Brunt Consultancy s.i.brunt@ieee.org for BSI

Title : Disposition of comments on ISO/IEC FCD 15457-1:2006

Author/Submitter : Steve Brunt, Project Editor ISO/IEC 15457-1

Requested action : To accompany ISO/IEC FDIS 15457-1:2007

Document type: WG1 Committee Document

Document subtype: N/A

Document stage: N/A

Document language: English

1	2	(3)	4	5	(6)	(7)
MB ¹	Clause No./ Subclause No./ Annex (e.g. 3.1)	Paragraph/ Figure/Table/N ote (e.g. Table 1)	Type of com- ment ²	Comment (justification for change) by the MB	Proposed change by the MB	Secretariat observations on each comment submitted
FR1	2		ed	ISO/IEC 7810 now include all basic specifications	Include ISO/IEC 7810 in the document	Result: Rejected. Reason: ISO/IEC 7810 does not encompass Thin Flexible Cards within its scope and ID-1 cards are explicitly excluded from the scope of ISO/IEC 15457. Action taken: None
FR2	3.17		ed	Join or splice is only for contactless cards	Add « applicable to contactless cards : » before the actual definition	Result: Rejected as stated. Reason: The restriction of joins or splices to contactless cards is a requirement and should be stated within the body of the standard. It is not part of the definition of the terms. Action taken: (1) In 3.17, reinforced the restriction to contactless cards by modifying the text in parenthesis to read "e.g. to eliminate one or more defective contactless cards" (2) Added footnote to Table 5, referenced to "Fan-fold" and "Reels" in left-most column. Footnote reads: "Reels and fan-fold packs of TFCs shall not contain any splices or joins (except in the special case of contactless TFCs – see clause 8)." (3) Added introductory text to

						head of clause 8. Introductory text reads: "The requirements contained within this clause are entirely specific to contactless TFCs and shall not be applied to any TFC that is not a contactless card. Furthermore, in the case of contactless TFCs only, where any specific requirement stated in this clause conflicts with one or more of the general TFC requirements stated elsewhere in this document then the specific requirement contained in this clause shall be applied."
FR3	4.1		ed	Delete tabs before TFC.1 and Special TFC.1		Result: Accepted. Action taken: Extra tabs removed
FR4	6	Table 3	ed	Add "allowed" in table 3 for "Reel / Special TFC.1"		Result: Accepted with modification. Explanation: The reference to Table 3 is an error. The table in question is Table 5. Action taken: The word "allowed" was inserted into Table 5.
FR5	6.3.1	Figure 14	ed	It's not D1but Di	Replace D1 by Di (see table 5)	Result: Accepted. Action taken: Symbol modified as required.
FR6	8.4.1		ed	Used de same unit (°) than in the figures 21 and 22	Replace « 30 minutes » by « 0,5° »	Result: Accepted.

						Action taken: Unit symbol modified as required.
FR7	8.10		ed	The operating temperature is already define in table 3 in 4.7.3 (- 20°C to 50 °C).	Put the same value -20 °C in paragraph 8.10	Result: Rejected Reason: This is not an editorial change since it involves a change in requirement. Furthermore, WG1 cannot arbitrarily change the contactless TFC (LUC) requirements without checking with WG8. Action: Introductory text inserted for clause 8 that explains that clause 8 items may override - in the sole case of contactless TFCs.
JP1	2. Normative references	ISO/IEC 15693-1	ED	Editorial error.	"Close-coupled cards" should be changed to "Vicinity cards".	Result: Accepted. Action taken: Standard subtitle modified as required.

Proj Ed	8.5		Ed	As written, this is not good English and does not state a requirement. It also contains a "self-reference" to ISO/IEC 14443.	Replace existing text with: "The PICC shall continue to operate as intended under exposure to ultra-violet light levels greater than those encountered in ordinary daylight at sea-level."	Result: Actioned. Explanation: Improper sub-clause needs correction. Action taken: Text modified as proposed.
Proj Ed	8.7, 8.8, 8.9		Ed	References are made to ISO/IEC 10373 without specifying the relevant part.	Insert part numbers for ISO/IEC 10373 references.	Result: Actioned. Explanation: Incomplete references.
Proj Ed	3.19		Ed	The titles of standards containing the word "Circuit(s)" have now been modified to "Circuit"..	Replace "Circuit(s)" with "Circuit".	Result: Actioned. Explanation: Need to track change in standards' titles and definition of ICC.
Proj Ed	3.19, 8.5 – 8.10		Ed	In ISO/IEC 14443, the term PICC will (probably) no longer refer explicitly to a card. Furthermore, when it did so it referred explicitly to an ID-1 card.	Since ISO/IEC 15457 relates to Thin Flexible Cards, replace the term PICC with the term card and remove PICC from the terms and definitions.	Result: Actioned Explanation: The term PICC is becoming "uncoupled" from the word "card" in order that ISO/IEC 14443 shall be able to encompass other non-card formats (including "format-free").
