In accordance with minutes of M1.3 meeting (m1/07-0699), I am hereby issuing a call for contributions on guidance for the summarization of single modality quality with respect to CBEFF quality encoding. Several ideas have been mentioned, including minimum, maximum, or some simple function. As was stated in the meeting, a balance needs to be struck between utility and complexity of implementation.

Please send any comments or contributions to the email address above before the close date described above. Comments and contributions received will be considered at the next meeting of INCITS M1.3.
