DHS	4.17		te	Add Note from SC 37 N684 para 3.4.2 .	Add "NOTE Testing is carried out on a complete system in an environment that models a real-world target application of interest. Each tested system will have its own acquisition sensor and so will receive slightly different data. Consequently, if multiple systems are being compared, care will be required that data collection across all tested systems is in the same environment with the same population. Depending on the data storage capabilities of each device, testing might be a combination of offline and online comparisons. Test results will be repeatable only to the extent that the modelled scenario can be carefully controlled."	
DHS	4.20		te	Add note from SC 37 N684 para 3.5.1	Add "NOTE The claimed identity might be in the form of a name, personal identification number (PIN), swipe card, smart card or RFID card read by the system."
