DHS	4.1.3.4	NOTE 1	ed	Crew is defined earlier as subjects for Scenario tests. Suggest rewording for Operational tests.	Modify NOTE 1 to read: NOTE 1 User habituation to device(s) under test can have a substantial impact on error rates and throughput rates. Testing a habituated test subject group will tend to generate lower FNMR and FTA, and shorter throughput times, than testing non-habituated test subjects.	
DHS	4.1.3.4	After NOTE 6	te	Suggest adding a new Note 7 to further define habituation reporting requirements for instances where the device is installed for test purposes only.	Add new NOTE 7 to read as follows: NOTE 7 For tests in which the biometric device is installed for the purposes of evaluation only, Experimenters should allow sufficient time for users to become habituated before collecting data that is intended to predict the long-term performance of the device. This time may be stipulated either as a specific period (for example, 2 weeks), the time required to obtain a minimum average number of subject interactions, or by monitoring performance data to determine when the test subject group "learning curve" flattens out indicating that sufficient habituation has been obtained.	
DHS	4.1.3.6	4.1.3.6	te	Current wording of this section is unclear with respect to the definition of Acclimitization. Based upon the definition provided in Section 3.1 that Acclimitization is "primarily associated with a subject's temporal adjustment to environmental effects, such as skin temperature" it is suggested that the section be rewritten.	A suggested rewording of the entire section is as follows: Information regarding the degree that test subjects are provided the opportunity to acclimate their biometric sample to the test environment prior to utilizing the biometric device shall be reported. Justification for the amount of acclimitization or, in cases where acclimitization effects are not considered significant, the reason for not including them in the evaluation shall be provided by the Experimenter.

DHS	4.1.3.6	NOTE	Te- minor	The note seems to be confusing the definitions of acclimatization and habituation. The cited example describes end user behavior that is an instance of habituation (section 3.10) rather than acclimatization.	Suggest either deleting this note or replacing it with a more appropriate example	
DHS	4.1.4.2	1 st sentence	ed	Add "s" to end of word "transaction".	Add "s" to end of word "transaction".	
DHS	4.2.4.2	NOTE	ed	Add "p" to current word "aramaters".	Add "p" to current word "aramaters".	
DHS	4.4.2	1 st Bullet; 1 st section	Te- minor	Clarify requirement for ROC curve representation of results.	Suggest adding to current 2 nd sentence to read as follows: Such data shall be rendered in the form of a ROC curve (if match scores are available).	
DHS	4.4.2	1 st bullet; 2 nd section	Te- minor	Clarify requirement for reporting of FTA.	Suggest adding to current 1 st sentence to read as follows: Failure to acquire rate (if failures to acquire are known).	
DHS	4.4.2	2 nd bullet; 2 nd section	Te- minor	Clarify requirement for match score reporting.	Suggest adding to existing sentence to read as follows: Distribution of match scores for genuine users and impostors (if match scores are available).	
DHS	4.4.3	1 st sentence	ed	Remove "l" after word "each".	Remove "l" after word "each".
