

INCITS 1575-D – M1.4 Editor’s Proposed Disposition of Comments on 5th INCITS M1 Letter Ballot for the POS Application Profile

#	Section	Organization	Type	Comment	Proposed Disposition
1	Section 3.2	Aerospace	Editorial	Isn't this standard published? If so, change to include INCITS # and delete the "3.2 Standards currently under development" section heading. Update remainder of document as needed.	Reject I show no favoritism... this is a duplicate of NIST comments, which were accepted.
2	Section 5.4 1 st paragraph 1st sentence	Aerospace	Minor editorial	Delete "or security system"	Accept
3	Section 5.4 3 rd paragraph 1st sentence	Aerospace	Minor editorial	Change from "As an example, consider the various steps comprising the registration of a new end-user within an application (for example, an employee access control system)." to "As an example, consider the various steps comprising the registration of a new end-user within an application controlling access to financial accounts for the purpose of enacting a POS transaction."	Accept
4	Section 5.4 1 st bullet of long list	Aerospace	Editorial	Change from "If the subject is identified as unique, the system will establish the subject as a new end-user of the system, and assign a unique Identifier by which they are known to that system. An example of an Identifier would be an access control ID number." to "If the subject is identified as unique, the system will establish the subject as a new end-user of the system, and assign a unique Identifier by which they are known to that system. An example of an Identifier would be an account access ID number."	Accept
5	Section 5.4 sentences following figure 2	Aerospace	Editorial	Split insert a paragraph break between the 1 st sentence and the 2 nd sentence.	Accept
6	Section 5.4 sentences following figure 2	Aerospace	Editorial	New 2 nd sentence, change from "Continuing with the example of an employee access control system, it is instructive to consider what happens when a claimant wishes to gain access to the system." to "Continuing with the example, it is instructive to consider what happens when a claimant wishes to gain access to the system."	Accept
7	Section 5.4 bulleted list following figure 2, 1 st bullet	Aerospace	Editorial	Change from "This is usually achieved either by inputting the username associated with the end-user, or by presenting a token to the system." to "This is usually achieved by presenting a token to the system."	Accept
8	Section 5.4 bulleted list	Aerospace	Editorial	Change from "If the biometric decision is positive,	Accept

	following figure 2, last bullet			the Identifier that was stored in the end-user record is relayed to the application (see figure 3 below) where the end-user is authorized, according to their application rights and privileges, which in this case would grant them access to the system. ” to “If the biometric decision is positive, the Identifier that was stored in the end-user record is relayed to the application (see figure 3 below) where the end-user is authorized, according to their application rights and privileges, which in this case would grant them access to the financial accounts.”	
9	Section 3.1	NIST	Editorial	Add to clause 3.1 Existing Standards: j) INCITS 396-2005 - Information technology - Hand Geometry Format for Data Interchange [justification: move this now approved standard from clause 3.2, Standards currently under development]	Accept
10	Section 3.1	NIST	Editorial	2) Change clause 3.1 h) to: INCITS 398 - 2005 - Information technology – Common Biometric Exchange Formats Framework (CBEFF) [justification: NISTIR 6529-A is now an INCITS approved standard]	Accept
11	Section 3.2	NIST	Editorial	3) Delete clause 3.2, Standards currently under development. [justification: no referenced standards are still under development]	Accept
12	Cover page/Forward	NIST	Minor Editorial	4) Global edits: a) replace "NCITS" with "INCITS" [e.g., see cover page] b) replace "International Committee for Information Technology Standards" with "InterNational Committee for Information Technology Standards" [e.g., see Foreword]	Accept
