**Editor's Proposed response to comments on the initial draft of
Keystroke Dynamics Data format**

- Three Comments were received from: Sagem Morpho Inc. (SMI) on November 28, 2005.

1 **MB** = Member body (enter the ISO 3166 two-letter country code, e.g. CN for China)

2 **Type of comment:** ge = general te = technical ed = editorial

NB Columns 1, 2, 4, 5 are compulsory.

** = ISO/CS editing unit

Org / # ¹	Clause No./ Subclause No./ Annex (e.g. 3.1)	Type of comment ²	Comment (justification for change)	Requested change	Proposed Response	Proposed Change or Rationale
SMI 1	6.4.5	Te	The input type identifier field definitions seem incomplete to cover the whole range of possible input devices. If this sort of information is needed, then there should be reference to some external list of device types, or reference to a vendor-specified list of equipment types.	Reconsider the definition of this field, and add additional explanatory text.	Accept in principle	Contributions are welcomed.
SMI 2	6.4.9	Te	The biometric process type field in 6.4.9 is related to the application rather than the data format and should probably be in a higher-level field such as the CBEFF header.	Remove this field.	Accept	The proposed change will be made.
SMI 3	6..4.10	Te	The biometric process status field in 6.4.10 is unclear in meaning and should probably be in a higher-level field such as the CBEFF header.	Remove this field.	Accept	The proposed change will be made.
