

Minutes of Meeting of W1.1
October 18, 2000
Vancouver, Canada

This meeting was held in conjunction with IS&T NIP 16 International Conference. Participants in the conference were invited to an open meeting of W1.1 to acquaint them with the committee.

8:00 p.m. Meeting called to order by Norman Burningham, Chair of W1.1

Twenty three participants were present during the meeting who had interest in participating in the activities of W1.1 to generate standards on image quality of printers.

The charter of W1.1 as defined by the NCITS new work document was described to the attendees. The working procedures of the committee as described in the document, Guide for the Development of Standards, W1.1 document 2000-3, were discussed. Also the list of image quality attributes, W1.1 document 2000-4, was presented. Discussion of these items comprised the major content of the meeting.

When the functioning of the committee was understood by the attendees, those who were not already participants in the committee were invited to commit to active participation. Since employer approval and evaluation of individual work load was required before commitment could be made, those who were able to gain appropriate support were asked to contact Norman Burningham at email nwb@boi.hp.com to be added to the working teams. Individuals from Pantone, IBM, Xerox/Tektronix, and Lexmark expressed great interest.

9:25 p.m. Meeting adjourned.

Norman Burningham
