Color Rendition

R. E. Cookingham

May 22, 2002

### **Color Rendition Ad Hoc Group Teleconference Notes 5/22/02**

Present: Bob Cookingham, Eddy Dalal, Sue Farnand, Bill Kress, and Karin Topfer

Next Teleconferences: 2<sup>nd</sup> and 4<sup>th</sup> Wednesdays @ 1:00 PM EST: 6/26, 7/10, 7/24  
[subject to Oscar's schedule]

Oscar Martinez has agreed to he is interested in working with the Color Rendition ad hoc group. He is working on ink jet technology for HP in Barcelona. His contact information is [oscar\\_martinez2@hp.com](mailto:oscar_martinez2@hp.com).

We discussed the observations of the sweeps Eddy had printed and shared. The scans and metric show some indications of the presence of contours but it does not seem that we are in a position to base a standards metric on the metric in its current form.

#### Action Items:

1. Bill feels he has a metric that might be capable of predicting the presence of observable contours. It is based on the work he described verbally in his paper at PICS 2002.
2. Bill will discuss whether he can share more of the details of his method with the group with his management during his visit to Japan in June.
3. Bob will contact Oscar Martinez about what teleconferences times would be commensurate with his work schedule.
4. The next teleconference will be on Thursday, June 26, 2002.
