Color Rendition Ad Hoc Group Teleconference Notes 10/8/03

Present: Bob Cookingham, Eddy Dalal, Sue Farnand, Dmitri Gusev, Óscar Martínez, Karin Töpfer, and Eric Zeise

Next teleconference: November 12 at Noon EDT

Discussion 10/8/03:

General Issues:

1. Sue has drafted a paper and circulated for comments. Please respond directly to Sue with comments and suggestions.
2. Note the last page of the notes contains all the electronic and mail addresses so people can share the images as discussed. Please check your listing and verify it is correct.

Color Fidelity Discussion:

Karin distributed the data from the Spectrolino measurements of the image specific color patches just prior to the meeting. Team members agreed to play with the data and see what they could learn from it.

We agreed on the need for a common protocol for use in conducting the initial scaling experiments on the images. Sue agreed to draft a protocol and distribute it for comment and discussion.

There was a general request to send all data files in zipped files so they are able to get through corporate firewalls.

With the completion of the protocol we are planning to begin preliminary ranking experiments after the November 12th meeting.

Color Quantization Discussion:

Serpentine targets are being measured. The data should be back for distribution prior to the 11/12 teleconference.
